

I~ABELLE FRANCIS

JUNIOR
FULL-STACK
DEVELOPER

tech stack~

HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, Express, SQL(Postgres), Cypress, Jest, Azure, Netlify, Figma, Photoshop, InDesign, Illustrator

aspirations~

I aspire to be a **Frontend and UI developer** to feed into my love for both frontend development and UI/ UX

Currently Learning:

- PHP
- WordPress

Currently brushing up on:

Python, C# and Azure. Excited to learn even more and possibly venture into 3D software's like Three.js. But one step at a time!

certifications~

Microsoft

AZ-900: Azure Fundamentals

Firebrand

Software Development Fundamental

education~

Nottingham Trent University

Fashion Communication & Promotion 2:2

Coulsdon College

Creative Media Production A* A* A*

about~

After many years and hats in the customer service industry from food to finance, I decided to step away and take a gamble on myself. Once I built my first project, it was no longer my choice to continue learning, it was a must, which is why I applied for the School of code and out of 3,500 secured 1 of the 120 spots with the award-winning school. This has gifted me with the competency of building responsive solutions and creating beautifully intuitive user-interfaces. I'm a creative, out-of-the-box curious thinker with a growth mindset.

software development experience~

SOC: Junior Full-Stack Developer ~08/2022 - Present

Valuable learnings....

- Proficient in: HTML, JavaScript, React, frameworks, libraries, SQL, Cypress, Express, Node.js, RESTful API, Postman and version control using GitHub.
- Took it upon myself to learn Next.js, Tailwind, Figma and Netlify to supplement my learning.
- UI / UX fundamentals
- Agile Methodologies (Scrum and Kanban)
- Test-driven development
- Database management

Projects I'm proud of...

Circles:

- A rewarding project of 6 we designed this application to help socially isolated and vulnerable individuals to better connect and integrate into their local community.

Intrigued? [Visit the repo here.](#)

- Frontend utilises Next.js,
- Application makes use of Next Auth for authentication.
- A variety of libraries are utilised to enhance the app and increase productivity.
- Relational Database using PostgreSQL,
- Application tested with Cypress and Jest

The Icebreaker:

Visit the repo [here](#).

- A fun week-long project. The app was built with 4 wonderful people and aims to facilitate better connections & make meeting a new partner or team for bootcampers more seamless through unconventional means.
- Built in React,
- Application makes use of Next Auth for authentication.
- Styled using CSS.
- Relational Database utilised using PostgreSQL,
- Market research carried out, Disney ideations drawn up as well as empathy maps, user stories, personal wireframes and prototypes.

The Same Page:

Visit the repo [here](#).

- A fun question game project, helping couples and people ask the important questions, making sure they are on the same page.

Today's Times:

Visit the repo [here](#).

- Application designed in Figma.
- Built with React Vite
- Utilises a News API
- Styled using styled components and libraries

Firebrand : skills bootcamp ~ Jan - Apr 2022

A 12 week Software Engineer Skills Bootcamp that provided an understanding of software development.

Valuable learnings....

- Python and C# fundamentals
- Adoption of Cloud services specifically Microsoft Azure
